AB Because of its lubricating properties, velvety and silky feel to the
touch, high ability to absorb oils, long durability, and ability to
accelerate evapn. and dissipate heat, **boron nitride** is
being developed for use in **cosmetic** products. Formulations of
water/oil body **emulsions**, fluid sun creams and after-sun
emulsions which contained this substance to good advantage are
given.
ST **boron nitride cosmetic emulsion**
sun product
IT **Cosmetic emulsions**
Skin creams
Sunscreens
(**boron nitride** in)
IT Sunburn
(**boron nitride** in creams for treating)
